Brandon Pustejovsky is the Chief Data Officer for the United States Agency for International Development (USAID).   He leads the USAID Data Services team within the Office of the Chief Information Officer, providing a broad portfolio of data analytics, visualization, and digital curation services to USAID staff and partners worldwide.   Mr. Pustejovsky has been leading international development and humanitarian assistance operations for over 15 years, in cooperation with organizations such as UNHCR, the International Red Cross, the World Food Programme, and multiple non-profits.   His experience spans six continents and over 50 countries. Prior to working at USAID, he spent several years establishing humanitarian assistance operations in post-conflict and post-disaster environments.   His exposure to these unstructured settings gave him a growing appreciation for the role of evidence and data in providing clarity of purpose and programmatic direction.   Mr. Pustejovsky holds a B.A. in Foreign Service and French from Baylor University and an M.A. in International Relations from Yale University.
